

## **Protocol 19/22**

### **Randomized controlled trial comparing the performance of 19 gauge versus 22 gauge EBUS-TBNA needles in lung carcinoma.**

This is the trial summary. Minor changes in the protocol may occur.

#### **Trial design**

All patients with (suspected) stage IV lung carcinoma identified on spiral computed tomography scan and requiring an EBUS-TBNA investigation to obtain intrathoracic hilar or mediastinal lymph node tissue for diagnosis, subtyping and genotyping of lung cancer are eligible for participation in this study.
